

A workshop on Genome Editing Tools and Techniques

Author : Bioinformatics Review

Categories : [Bioinformatics News](#), [Upcoming Conferences](#)

Date : May 15, 2019

Department of Biotechnology (DBT), India is organizing a 5-day workshop on “*CRISPR/Cas mediated genome editing in plants: Applications, tools, and experimental design*” to address the strategies and methods involved in genome modification utilized as essential tools in research and development. This 5-days workshop is being organized along with “**Indo-U.S. Science & Technology Forum (IUSSTF)**” under the program “**Indo-U.S. Genome Engineering/Editing Technology Initiative (GETin) [DBT-IUSSTF Indo-US GETin 2019]**”.

The workshop is based on “Genome editing in Plants” at Biotech Auditorium, University of Delhi, South Campus, Dhaula Kuan, New Delhi 110 021 from **May 27th to 31st 2019**.

Applications are invited from Ph.D. students, Post-Docs & Young faculty (Professors/Scientists).
