
Bioinformatics Review: Scope

Author : Tariq Abdullah

Date : October 14, 2015

Bioinformatics Review is the pioneer bioinformatics resource magazine that has extended its reach with students, educators, and scientists. We aim to report latest development, trends and tools-of-trade in bioinformatics. We cover a very wide spectrum of topics including:

- **Bioinformatics Software/tools**
- **Algorithms**
- **Phylogenetics**
- **Protein Structure Prediction**
- **Genomics**
- **Proteomics**
- **Systems Biology**
- **Cancer**
- **Next Generation Sequencing**

Please note that Bioinformatics Review **IS** a peer-reviewed journal. We also publish science reports, popular articles and general articles with special focus on latest bioinformatics research and tools.
